EDUCATION

The University of Chicago

Chicago, IL, USA

MS in Computational Analysis and Public Policy

Expected May 2026

- Courses: CS with Applications I & II, Mathematics for CS, Machine Learning, Databases and Statistics I & II
- Teaching Assistant: Behavioral Finance, Real Estate Investments I and II

Institute of Business Administration (IBA)

Karachi, Pakistan

BS in Accounting & Finance

June 2018

- Courses: Financial Econometrics, Financial Modeling, Investment Banking, Security Analysis, and Portfolio Management
- Co-circular: Co-founded IBA Stock Exchange, a three-day stock simulation event with 500+ participants

PROFESSIONAL EXPERIENCE

Research Analyst

Chicago, IL, USA

Booth School of Business

December 2024 – Present

- Conducted financial modeling and quantitative analysis to support real estate and investment research, developing interactive dashboards/graphs using Python (Plotly/Dash) to visualize key insights featured on the [Booth website](#)
- Applied scenario modeling, sensitivity testing, and Monte Carlo simulation to evaluate risk, uncertainty, and valuation assumptions in real-estate investment models

Bank Examiner

Karachi, Pakistan

State Bank of Pakistan

October 2019 – August 2024

- Analyzed multi-bank FX transaction datasets to identify pricing patterns, market behavior, and systemic inefficiencies, generating insights used in policy and institutional discussions
- Evaluated the operational performance of a national social protection program overseeing Rs. 364Bn annually, diagnosing system bottlenecks and recommending improvements to strengthen service delivery
- Reviewed borrower-level data across 90,996 accounts, identifying pricing irregularities and informing adjustments totaling Rs. 33Mn to improve institutional practices and customer outcomes
- Conducted analysis of USD 1Bn+ in annual card-based cross-border transactions, uncovering structural patterns and information gaps that informed reforms to enhance market transparency

Investment Banking Analyst

Karachi, Pakistan

JS Bank

June 2018 - October 2019

- Analyzed financial ratios, trends, and balance-sheet indicators for 700 companies to identify potential investment-banking clients, surfacing distressed firms with rising leverage and concentrated bank exposures for a roadshow
- Developed financial models, conducted due diligence, and performed variance analyses for loan and acquisition decisions, improving loan approval decisions and to assess borrower risk

PROJECTS

- Developed a comprehensive valuation model incorporating financial analysis, forecasting, discounted cash flow (DCF) techniques, and competitor benchmarking to estimate intrinsic value and assess project feasibility
- Created an investment optimization tool that analyzes portfolio performance using historical pricing and correlation structures, applying Sharpe-ratio optimization to identify risk-efficient investment combinations
- Built a geospatial analytics tool using Shapely + Quadtree to perform 125k+ spatial joins 70× faster, enabling precise market mapping, site-selection analysis, and neighborhood-level catchment evaluations similar to real estate deal underwriting workflows.
- Worked with Promega Corporation to predict organoid health using a multimodal machine learning pipeline that integrated metabolite features with an image-based classifier to identify early signs of organoid viability

SKILLS & CERTIFICATIONS

- Python, R, SQL, Power BI, Bloomberg, Reuters, Microsoft Certified Specialist (Word, Excel, PowerPoint)
- CFA Charter Holder (CFA Institute)

December 2020
