

RAABIYAAL ISHAQ

+1-773-690-7628 rishaq@uchicago.edu [linkedin.com/in/rishaq](https://www.linkedin.com/in/rishaq)

Data analyst with experience in Python-based modeling, machine learning, and quantitative analysis, applying advanced data tools to support research, market analysis, and evidence-based decision-making

EDUCATION

The University of Chicago

Chicago, IL, USA

MS in Computational Analysis and Public Policy

Expected May 2026

- Courses: CS with Applications I & II, Mathematics for CS, Machine Learning, Databases and Statistics I & II

Institute of Business Administration

BS in Accounting & Finance

June 2018

- Courses: Financial Econometrics, Financial Modeling, Security Analysis, and Portfolio Management

PROJECTS

- Developed a quantitative tool analyzing portfolio performance using historical pricing and correlation structures, applying Sharpe-ratio optimization to identify risk-efficient investment combinations in S&P 500
- Built a geospatial workflow in Python to merge and analyze location-level datasets using Shapely and a Quadtree structure, supporting evaluation of geographic distribution and proximity patterns
- Used NumPy and Pandas to calculate average delays, analyze proportions of delayed and canceled flights, and compare carrier performance to industry benchmarks; used time series analysis to identify seasonal trends
- Implemented text analysis algorithms to identify key themes, hashtags, and salient terms in political tweets using token frequency, n-grams, phrase extraction, and TF-IDF.
- Simulated household relocation dynamics using Schelling's segregation model to study how individual housing preferences and neighborhood composition drive spatial clustering and market-level settlement patterns
- Developed a supervised ML classification model for Promega Corporation to analyze large, high-dimensional datasets, enhancing predictive accuracy through feature engineering and rigorous model testing

PROFESSIONAL EXPERIENCE

Booth School of Business

Chicago, IL, USA

Research Analyst

December 2024 – Present

- Designed and developed interactive web-based analyses and visualizations translating economic, market, and policy-relevant research into publicly accessible research deliverables, [published online](#)
- Contributed financial modeling (VBA + Macros) expertise to several working papers, applying quantitative analysis to support research in investment and real estate finance

Central Bank of Pakistan

Bank Examiner

October 2019 – August 2024

- Analyzed multi-bank FX transaction datasets to identify pricing patterns, market behavior, and systemic inefficiencies, providing clarity on market behavior and generating insights informing senior management reviews
- Evaluated the operational performance of a large-scale national disbursement program overseeing Rs. 364Bn annually, diagnosing system bottlenecks and recommending improvements to strengthen operations
- Reviewed borrower-level data across 90,996 accounts, identifying pricing irregularities and informing adjustments totaling Rs. 33Mn to improve institutional practices and customer outcomes
- Conducted analysis of USD 1Bn+ in annual card-based cross-border transactions, uncovering structural patterns and information gaps that informed reforms to enhance market transparency

JS Bank

Investment Banking Analyst

June 2018 - October 2019

- Performed exploratory data analysis on 700+ firms using financial ratios, trend analysis, and risk indicators to detect distress signals and prioritize investment-banking outreach

SKILLS & CERTIFICATIONS

- Python(Numpy, Pandas), R, Power BI, Bloomberg, Reuters, Excel (Advanced), Financial Modeling (DCF, Forecasting), Data Visualization (Altair, Plotly, Dash), SQL, CoStar
- CFA Charter Holder (CFA Institute)

December 2020
