

RAABIYAAL ISHAQ, CFA

+1-773-690-7628 rishaq@uchicago.edu [linkedin.com/in/rishaq](https://www.linkedin.com/in/rishaq)

Analyst with experience combining financial modeling, quantitative analysis, and advanced data tools to support research, market analysis, and data-driven decision-making

EDUCATION

The University of Chicago

Chicago, IL, USA

MS in Computational Analysis and Public Policy

Expected May 2026

- Courses: Machine Learning, Applied Fintech, Data Visualization, Databases and Statistics I & II
- Teaching Assistant: Behavioral Finance, Real Estate Investments I & II

Institute of Business Administration

BS in Accounting & Finance

June 2018

- Courses: Corporate Finance, Financial Modeling, Financial Econometrics and Financial Income Investments

PROFESSIONAL EXPERIENCE

Booth School of Business

Chicago, IL, USA

Research Analyst for Professor Joseph Pagliari

December 2024 – Present

- Designed and developed interactive web-based analyses and visualizations translating economic, market, and policy-relevant research into publicly accessible research deliverables, [published online](#)
- Built structured Excel/VBA models incorporating tax rules, cash-flow waterfalls, and scenario analysis to quantify effective tax rates and elasticities in an academic study of carried interest taxation

Central Bank of Pakistan

Bank Examiner

October 2019 – August 2024

- Analyzed multi-bank FX transaction datasets to identify pricing patterns, market behavior, and systemic inefficiencies, providing clarity on market behavior and generating insights informing senior management reviews
- Evaluated the operational performance of a large-scale national disbursement program overseeing Rs. 364Bn annually, diagnosing system bottlenecks and recommending improvements to strengthen operations
- Reviewed borrower-level data across 90,996 accounts, identifying pricing irregularities and informing adjustments totaling Rs. 33Mn to improve institutional practices and customer outcomes
- Conducted analysis of USD 1Bn+ in annual card-based cross-border transactions, uncovering structural patterns and information gaps that informed reforms to enhance market transparency

JS Bank

Investment Banking Analyst

June 2018 - October 2019

- Built financial models, supported due diligence for acquisitions and loan transactions, and prepared the prospectus for a Rs. 7 Bn AT1 issuance that was oversubscribed
- Analyzed 700+ companies using Excel to identify distressed firms for investment banking outreach and initiated the sale process for a major supermarket chain, preparing models and coordinating advisors

PROJECTS

- Built a comprehensive valuation model of Engro Fertilizer incorporating financial analysis, forecasting, DCF techniques, and competitor benchmarking to estimate intrinsic value and assess investment feasibility
- Developed a quantitative tool analyzing portfolio performance using historical pricing and correlation structures, applying Sharpe-ratio optimization to identify risk-efficient investment combinations in S&P 500
- Built a geospatial workflow in Python to merge and analyze location-level datasets using Shapely and a Quadtree structure, supporting evaluation of geographic distribution and proximity patterns
- Simulated household relocation dynamics using Schelling's segregation model to study how individual housing preferences and neighborhood composition drive spatial clustering and market-level settlement patterns
- Developed a supervised ML classification model for Promega Corporation to analyze large, high-dimensional datasets, enhancing predictive accuracy through feature engineering and rigorous model testing

SKILLS & CERTIFICATIONS

- Python(Numpy, Pandas), R, Power BI, Bloomberg, Reuters, Excel (Advanced), Financial Modeling (DCF, Forecasting), Data Visualization (Altair, Plotly, Dash), SQL, CoStar
- CFA Charter Holder (CFA Institute)

December 2020
